

Reminders to Programs that are Open and Accepting Children into Care During the COVID-19 Pandemic

Daily Health Checks

- Encourage families and staff to perform a self check at home and to stay home if they have any symptoms of illness.
- Please assess if your staff members are in the high risk population for severe illness with COVID-19. They should remain home and avoid social gatherings during this time. The CDC defines high risk populations as:
 - Over age 65
 - People who have serious underlying medical conditions like:
 - Heart disease
 - Diabetes
 - Lung disease (COPD, Asthma, Emphysema, etc.).
 - Immunocompromised
- Please review your program's health care plan: **Appendix A: Instructions for Doing a Daily Health Check**
 - You may also want to conduct your daily health check and conversation in the parking lot or at the main entrance to the program during this time.
 - Please include the following questions on a **daily** basis:
 - Have you or anyone in your home traveled outside the country within the last 14 days?;
 - Have you had contact with any Persons Under Investigation (PUIs) for COVID-19 within the last 14 days, **OR** with anyone with known COVID-19?
 - Does your child or anyone in your home have any symptoms of a respiratory infection (e.g., cough, sore throat, fever, or shortness of breath)?
 - It may be helpful to create a checklist of these questions as well as the normal daily health check questions so that nothing is omitted
- Please perform a daily health check on your staff prior to entering the building and keep a separate documentation log for staff. Include the questions above.
- If parents or staff answer **YES** to any of the above questions, they are **NOT** to enter the child care and should be advised to return home and remain at home. Have them contact their health care provider via **PHONE** for guidance. Also, have them contact DOH for further instruction if they answer **YES** to question 1 or 2.

Daily Health Checks – Cont.'

- Please keep detailed records of any children and/or staff that were sent home with signs of any illness in your daily health checks documentation. You may need to refer back to these notes at a later time.
- Alert local health officials about large increases in student and staff absenteeism, particularly if absences appear due to respiratory illnesses (like the common cold or the “flu,” which have symptoms similar to symptoms of COVID-19).
- You may want to implement taking temperatures at the door for children and staff. Keep a detailed log of temperatures. ****The CDC defines a fever as 100.4 degrees F****
- **PLEASE DO NOT** require doctor notes to return back into care at this time for minor illness such as pink eye. Medical professionals are overloaded at this time and many are not seeing patients in the office as they are trying to minimize exposure of COVID-19 to their patients. If you should have a question whether a child should return back into care, please contact your program’s health care consultant or local DOH.

Cleaning/Sanitizing/Disinfecting

- Please refer to your program’s health care plan: **Appendix E: Cleaning/Sanitizing/Disinfecting**. Please remember to prepare bleach solutions daily and follow the instructions on this appendix. Please note that the CDC has different instructions on their website for bleach solutions when there is a suspected and/or confirmed case in your facility. **DO NOT** use this solution ratio on a daily basis.
- Reminder: Bleach Solution #1 is used for cleaning and sanitizing. Bleach solution #2 is used for cleaning and disinfecting.
 - Here is a helpful chart: https://www.naeyc.org/sites/default/files/globally-shared/downloads/PDFs/accreditation/early-learning/clean_table.pdf
- Please print out this document and post accordingly: <https://ocfs.ny.gov/main/news/2020/COVID-group-residential-interim-cleaning-guidance.docx>
- If your program is using an EPA product, please contact your program’s health care consultant to see if it is safe to use in a child care setting as well as if the product sanitizes AND disinfects. Once approved, please follow all product directions in regards to dwell times on surfaces and product use. Please see the attached list of EPA pre-approved products for use with emergency enveloped viral pathogens and can be used with the current COVID-19 outbreak.

Handwashing/Respiratory Etiquette

- Have all staff and children wash hands immediately upon arrival.
- Please refer to your program’s health care plan: **Appendix B: Hand Washing**.
 - Follow regular handwashing procedures throughout the day.
 - Frequent hand washing with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, and after they blow

their nose. Help young children do the same. If hands are visibly dirty, use soap and water to clean hands.

- If soap and water are not readily available, using an alcohol-based hand sanitizer with at least 60% alcohol for children 2 years old and up.
- Advise children and staff to avoid touching their eyes, nose, and mouth with unwashed hands. Cover coughs or sneezes with a tissue, then throw the tissue in the trash and clean hands with soap and water or hand sanitizer (if soap and water are not readily available).
- Provide adequate supplies for good hygiene (including cleaning handwashing sinks) such as soap, paper towels, and alcohol-based hand sanitizer.
- Ventilate common spaces and classrooms as much as possible, especially when using cleaning/sanitizing/disinfecting products.

Other

- Ensure that you are working in smaller groups with less than 10 people in a classroom
- Omit family style dining – have providers prepare snacks and food utilizing gloves and try to limit child to child contact during meals
- Throw away playdough and other sensory materials that was used last week and make new or consider omitting from your program at this time.
- Plan as many outdoor activities as possible.
- Allow for extra breaks for your staff – mental breaks as well as extra time for handwashing, cleaning/sanitizing/disinfecting, etc.
- Please **DO NOT** utilize surgical and/or face masks as “personal protection” against COVID-19. There is an overall shortage of these items at this time.
- Please only use gloves when you will be exposed to bodily secretions. Please refer to your program’s health care plan: **Appendix F: Gloving** for proper gloving and ungloving techniques. Again, there is a shortage of gloves. Please refrain from wearing gloves throughout the day. This will only help to facilitate the spread of all germs around the childcare and onto the children, yourself and others; it will not protect you from getting the virus.

Please contact your program's Health Care Consultant with any questions and/or concerns. If your program does not have a Health Care Consultant, please contact Child Care Resources of Rockland 845-425-0009 or New York State Department of Health (NYSDOH) 2019 Novel Coronavirus 24-hour hotline at 1-888-364-3065.

Novel Coronavirus (COVID-19)—Fighting Productsⁱ

The American Chemistry Council's (ACC) Center for Biocide Chemistries (CBC) has compiled a list of products that have been pre-approved by the U.S. Environmental Protection Agency (EPA) for use against emerging enveloped viral pathogens and can be used during the 2019 novel coronavirus (COVID-19) outbreak. This product list is not exhaustive but can be used by business owners, health professionals, and the public to identify products suitable for use against COVID-19.

The information in this document is being provided as a public service. All efforts have been made to ensure the information is accurate, but ACC and CBC make no representations or warranties as to the completeness or accuracy of the information. ACC, CBC, and the product manufacturers listed in this document reserve the right to change, delete, or otherwise modify the information without any prior notice. Persons receiving this information must make their own determination as to a product's suitability prior to use based on the product labeling. ACC and CBC do not guarantee or warrant the standard of any product referenced or imply approval of the product to the exclusion of others that may be available. All products listed are registered for labeled uses in accordance with federal laws and regulations as of the date this document is being made available. State regulations may vary. In no event will ACC or CBC be responsible for damages of any nature whatsoever resulting from the use of or reliance upon products to which the information refers.

For use of the product, please contact the company/distributor to confirm use directions, or consult the EPA approved label at <https://www.epa.gov/pesticide-labels/pesticide-product-label-system-ppls-more-information>.

As a public service, CBC is maintaining this list of antimicrobials that have proven to be effective against stronger pathogens, such as norovirus or ebola. By publishing and maintaining this open list, CBC relieves federal, state, and local health officials' resources in order to focus on other aspects of the important effort to limit spread of this new disease. Listing is voluntary and compliance with EPA's "emerging viral pathogen" guidance for antimicrobial products is verified by CBC. CBC will be working with federal and state officials to disseminate the list and make it accessible to all those who need to be in the know.

ⁱ To include a product on CBC's list of Coronavirus—Fighting Products, please contact Ms. Komal K. Jain at komal_jain@americanchemistry.com
